

## Edwin Gerritsen - DEMCON

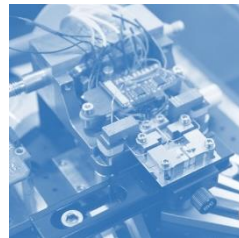

*EPIC online technology meeting on robotics industrial lidar and factory automation*

*December 2020*

# Company overview

## DEMCON GROUP:

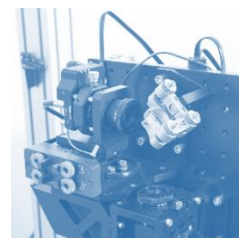

- Founded 1993 in Enschede, The Netherlands (NL)
- High-end provider of client specific technology in a variety of market segments
- Start 2020 numbers:
  - Employees: >750 mostly engineers
  - Revenue: > 100M€
  - > 70 % Export
  - 6 Offices NL/DE/SG
- DEMCON Industrial Systems focusses on high-end system integration for the manufacturing industry.

INDUSTRIAL SYSTEMS

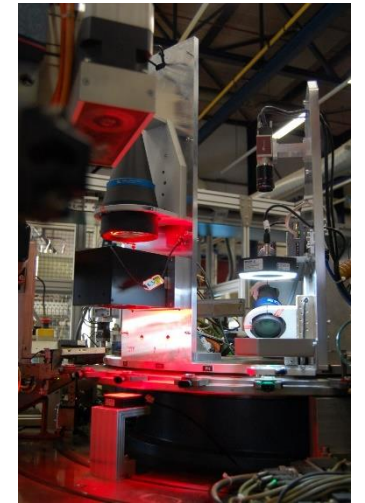

# Demcon Industrial Systems – Partner for production technology

## What we do:

- Develop, create and support **client specific production technology** for the manufacturing (production) industry.
- Modular and scalable **factory automation** concepts that grow with your business.
- Experience ranges from :
  - Production tooling
  - High precision pick & place assembly systems
  - Micro machining stations
  - Quality inspection systems
  - Bespoke production machinery
  - Pilot production lines
  - Industrialization of production (from lab to full scale)

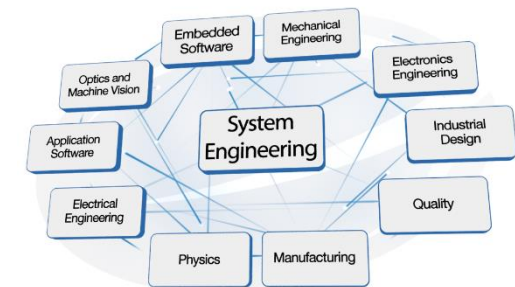

High precision p&p

Quality control

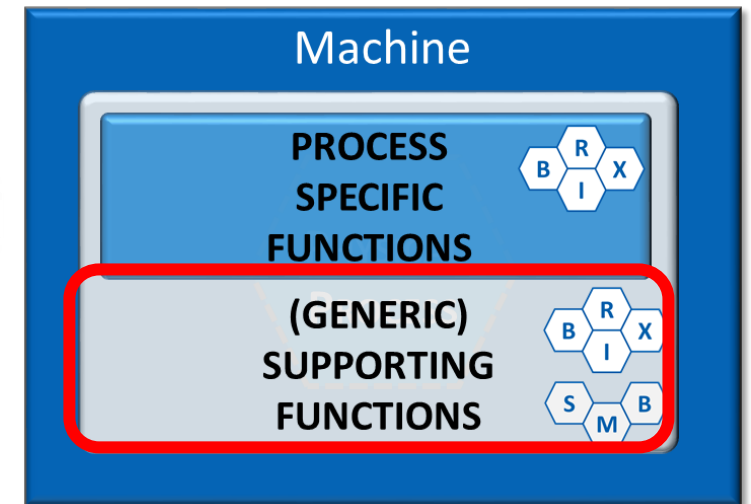

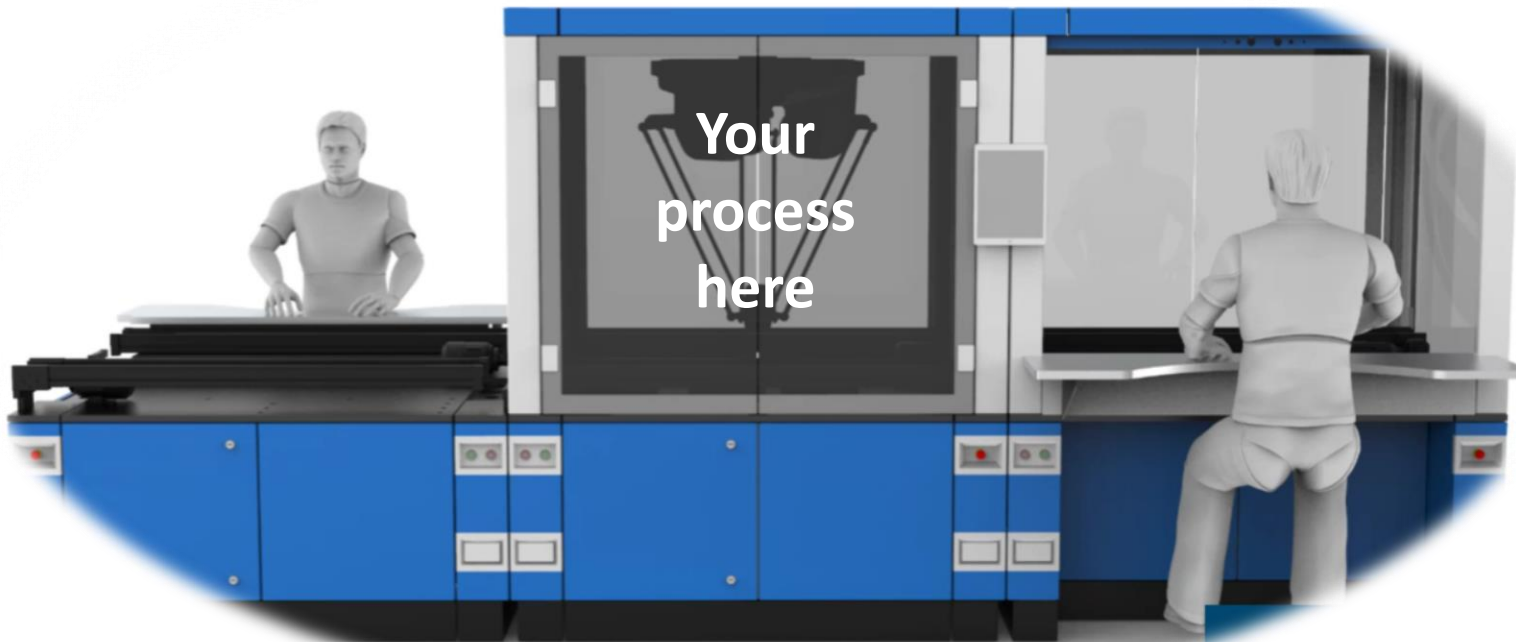

## What sets us apart:

- Wide and deep technical expertise in nearly all engineering fields.
- Pragmatic and simple if possible, complex when needed.
- We are able to help clients to achieve their production vision even when requirements are not fully clarified

# Smart Machine Base

*...a standardized yet flexible machine base with functionality to integrate a customer specific machine*

- Used as **starting point** in the development of client specific systems to reduce time and cost and increase quality.
- The SMB covers all generic **support functions** for a client solution e.g. PLC, HMI, mandatory safety functions, electrical power, pneumatic air supply, control cabinets, and a **pre-engineered modular** control architecture.
